Innovative Thinking – Detail-Oriented – Collaborative Problem Solver

I excel in fast-paced environments, contributing to the development of user-focused software solutions. With expertise in JavaScript and ReactJS, I design, implement, and test new features while overcoming technical challenges. I collaborate closely with product management to ensure solutions meet user needs and business goals.

---

**Core Competencies**

|                    |                 |                     |
